Time: 10:00 am – 11:30 am
Venue: AAB 1153, Academic & Administration Building
BU Road Campus, HKBU
Language: English

Abstract

This seminar addresses what I believe to be the major theme in the development of public health and disease control policies in China in the last century. It offers a framework that might illuminate how such policies were formulated and implemented. It is hoped that this seminar will help to identify new areas of research in this important topic.

All are welcome
